Beckman Instruments is proud to announce a new release: the 1967/68 Electronic Instrumentation Catalog. A complete guide to electronic instruments, this full length feature contains more than 200 pages on state-of-the-art electronic measurement.

Included in the catalog are major sections on data systems and recorders, electronic instruments, and medical instrumentation. Within each section are complete product specifications and pricing information on oscillographic recorders, electronic counters and timers, and data systems and components.

One entire section is devoted to application information and data. Selected short subjects include "Oscillographic Techniques," "Frequency and Time-Interval Measurement," "Accuracy in Data Systems," and a "Physiological Measurement Guide."

Your seat is reserved for this exclusive engagement with the new Beckman Electronic Instrumentation Catalog. For your private showing, just mail the attached reply card. (For a double feature, an additional reply card is attached so that your friends don't miss the show!)
